

APPLICATIONS

Eni Trafila 605 is a lubricant oil specially formulated with highly refined mineral base oil and synthetic ester to give to the product specially anti-wear and lubricating properties.

Suitable for drawing and profiling copper pipes and its alloys in applications that require low speeds and high reductions.

CUSTOMER ADVANTAGES

- High anti-corrosive properties on ferrous and non-ferrous materials
- Excellent lubricating and anti-weld properties, good wettability and high chemical stability
- High antioxidant properties
- Free of chlorine, sulfur and their derivatives

CHARACTERISTICS

Properties	Method	Unit	Typical
Appearance		-	clear liquid
Density at 15°C	ASTM D 4052	kg/m ³	900
Viscosity at 40°C	ASTM D 445	mm ² /s	245
Flash point (COC)	ASTM D 92	°C	240
Pour point	ASTM D 97	°C	-15
